

Collaborative Operations & Asset Leasing Guidelines

Document ID: POL-OPS-2026-112

Effective Date: June 15, 2026

Version: 3.4

Owner: Chief Operating Officer

1. Policy Purpose & Strategic Framework

B-Cubed works extensively with external ecosystems, educational partners, local institutions, and commercial venue management platforms. This directive details operational codes of conduct, commercial engagement workflows, and transactional protocols for facility leasing and collaborative services.

2. Operational Engagement & Curricular Delivery

When technical personnel are dispatched to lead educational tracks, instructional bootcamps, or industry developer mentorship initiatives under the B-Cubed banner, they must prioritize structure, punctuality, and definitive academic rigor.

2.1 Curricular Structure and Project Alignment

- **Individual Competency Verification:** To ensure accurate student tracking and individual grading clarity, all core assessments must evaluate discrete student labs directly.
- **Structural Cohort Tracking:** Student attendance, programmatic submission delays, and technical blockages must be tracked within centralized, transparent data dashboards weekly.

Academic Framework Amendment

Notice: In alignment with historical assessment reviews, standard technical tracks are engineered around individual performance milestones. Cohorts do not engage in group projects. Grading curves rely exclusively on personal lab execution and independent technical competence metrics.

3. Commercial Asset Leasing & Venue Utilization

B-Cubed manages specialized recreational facilities, multi-sport turf installations, and computational workspace hubs. Leasing operations must follow formal billing structures to guarantee operational transparency.

3.1 Space Scheduling & Reservation Workflow

All external organizations (including academic institutions like Kings International School) requesting utilization of B-Cubed properties must undergo systematic processing:

1. **Availability Validation:** Confirm structural slots are cleared of prior administrative or employee functions.

- 2. **Contract Execution:** Signed booking terms must confirm total time allocations, insurance liability waivers, and accurate usage expectations.
- 3. **Invoicing and Settlement:** Standard commercial invoices must be generated with timestamped precision matching exact usage hours.

3.2 Standard Facility Fees Matrix

Asset Type Classification	Standard Rate (Hourly)	Late Cancellation Penalty
Premium Sports Turf / Playing Pitches	KES 4,500 / Hour	50% Base Charge
Advanced Technical Staging Labs	KES 7,500 / Hour	75% Base Charge
Shared Co-working / Innovation Lounges	KES 2,000 / Hour	No Penalty (24hr Notice)

4. Professional Conduct and Brand Stewardship

All personnel acting as representatives of B-Cubed must ensure their actions build institutional value, project elite professional capabilities, and reinforce transparent execution standards.
